About Me

I have been playing with react for a little over 2 years, during which i've grown to love the react ecosystem. currently learning vue.js and react-native.

Education

2015-2019

CGPA: 3.35

Bsc. Information Technology

Eastern Mediterranean University (Northern Cyprus)

Skills

html5

css3

sass

git/github

Javascript

typescript

react

redux

redux-saga

redux-thunk

gatsby

next.js

styled-components

webpack

Projects

Traveler's map

Traveler's map is an online community where travelers from around the globe can share beautiful destinations they have visited, follow fellow travelers and exchange information, all using an interactive online map.

E-Souq

An E-commerce website with stripe integration for online payments.

Next.js Hacker News Clone

Server-side rendered progressive web app built using next.js and typescript.

Online Bazar

Online Bazar is an online marketplace, where authenticated users can post second-hand products for sale along. Users will be able to edit and manage their posted items in addition to being able favorite other user's items.

Gatsby-Portfolio

I decided to build my personal website with gatsby for better SEO, speed and easy CMS integration (in my case contentful). Also combining contentful Webhooks and netlify made continuous deployment a breeze for me.
